Commencing at 8 o'clock

Recreation Park, Crossfield, Sunday, May 31st.

Sponsored by The Crossfield and District Board of Trade

TIME FOR A PROPER ASSESSMENT

Comparison Brings Out Many Surprises. Council Has Big Job. Give Them Your Support.

ARREARS OF TAXES TOTAL \$1975.64

Regular meeting of the Village Council was held on Monday evening. Present: Mayor Williams, Councillors Amussen and Nichol. Minutes of previous meeting read and adopted.

COMMUNICATIONS
From the Dept. of Pensions re the application of R. G. Gibson for Old Age Pension.

The secretary was instructed to write the Department and inform them that Mr. Gibson had an equity in a farm in the Olds district, which could be investigated by them.

From the Department of Health covering general inspection of the town. Sanitary conditions in the village were found satisfactory. It was pointed out that the Council should see to it that a receptacle of some kind be used by all residents to hold tin cans rubbish, etc.

By request of the Council the health inspector J. Williams had met the Council and inspected the proposed new site of the nuisance grounds on the Becker farm and stated that the site was 80 rods east of the highway, partly surrounded with trees, was a safe distance, and quite suitable, and met with the approval of the Department.

An application was received from J. Sharp for a building permit for the erection of a blacksmith shop. The permit was granted providing Mr. Sharp erects a brick chimney in accordance with the bylaw.

An application for a building permit from F. Baker was granted for the erection of a brick and tile garage.

From the Secretary of the School Fair re grant. A grant of \$15.00 was made to the School Fair.

The secretary was instructed to write Mr. Amery and inform him that the Village intends putting a nuisance grounds on the North West quarter of the Becker place, asking him for price on two acres and a road way twelve feet wide.

The Board of Trade was given permission to fence the park.

Mayor Williams set the date of the annual clean up week from May 8th to 15th, when all good citizens are asked to clean up their premises.

The Council authorized the expenditure of \$35.00 for tie-posts on the Main Street, and the Mayor was authorized to get what work was necessary done with the grader and a hole or two filled.

Mayor Williams reported that he will be able to get two or three carloads of cinders from the C.P.R. for levelling up the south crossing, and all the expense to the village will be for a team and for spreading as the C. P. R. men will unload the cars.

The secretary was instructed to write Mrs. Noreland and inform her that unless taxes are paid on lot 24 within 30 day legal action will be taken to collect same.

The secretary was instructed to secure legal description of Mrs. Jones lots and have a caveat filed against same.

The Council decided to give Mrs. Adderly relief to the extent of \$12.00 a month by paying her rent. Councillor Amussen asked if the U. F. A. had paid the hall tax?

Mayor Williams replied that the U. F. A. felt that they were being dealt with unjustly and he would like to see some comparative figures to prove or disprove this statement.

He thought Mr. Laut's taxes would be a fair comparison. The secretary stated that Mr. Laut's tax, including his machinery shed and business was \$85.00, while the

Post Campaign Going Strong

The 25 cent Post Campaign for the fence at the Park is going strong, the Secretary of the Board of Trade states that \$75.00 have been received since the campaign opened. A total of 112 names being on the list, but 100 more names are needed to get the required amount. DO YOUR BIT.

U. F. A. Tax including lumber shed but not including hog lot was \$136.25 and in addition they were paying \$50.00 on the hall.

Mr. McCool appearing for the U. F. A. was asked to give his statement. Mr. McCool first registered his objection to the unjust discrimination against his organization. Why should they be made to pay 110 per cent more taxes than others conducting similar business and in addition be assessed \$50.00 for their hall.

He related the developments in 1925 leading up to the \$50.00 arrangement which was to cover picture show and travelling troupes. He produced figures to show that in addition to the picture show leaving, the other revenue had dropped 50 per cent, and thought the hall tax should also be reduced.

The Council fully concurred in Mr. McCool's suggestions and stood the matter over until a later date to check developments.

Councillor Amussen was of the opinion that it was not fair to the U. F. A. to charge them a license on their hall and let the Masonic Hall off without paying, as the Masonic Hall is being rented out for different meetings, etc.

Mayor Williams brought up the question of tax arrears and stated that at the present time they had no money to do anything with and that promises to pay had not been made good only in one or two cases.

It was moved and carried, that all property in arrears of taxes for two years or over be advertised for sale under the Tax Recovery Act, and that no exception be made. The owners of such property to be notified by registered letter that action is to be taken.

Permission was granted by the Mayor to ratepayers present to ask questions.

Councillor Nichol: "How much arrears of taxes have we?"
Secretary McCrory: "\$1975.64."

R. M. McCool: "How much of the \$1975.64 are over one year old?"

Secretary McCrory totalled several names totalling \$300.

R. M. McCool: "Is \$300.00 all that is over one year old?"

Secretary McCrory: "Approximately."

George Fox: "If these taxes and school taxes arrears are not collected, who pays them or who loses?"

"See McCrory: The school district loses the school tax and the village their tax."

Geo. Fox: "If only half of the people pay their taxes they also have to pay for the others."

See McCrory: "That's about what it amounts to."

Many more questions were asked which confirmed one fact—"That our finances are in bad shape through somebody's neglect to enforce the Tax Recovery Act."

Mr. McCrory stated that approximately \$300 is the amount of tax arrears over one year old. This statement is not correct or anything like it.

Since hearing the discussion of tax rates and the apparent unfairness, we have been doing some checking up, and below we give a few figures which are interesting.

Gastric relieved

WHAT most people call indigestion is usually excess acid in the stomach. Food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude biles. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the past years this invention, it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

(Made in Canada)

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate with no harmful after-effects.

Once you learn this perfect way to take the name Phillips on the bottle. All druggists have it—\$oc.

Be sure to get genuine Phillips' Milk of Magnesia. Look for the name Phillips on the bottle. All druggists have it—\$oc.

The Canadian Constitution

Is the constitution of the Dominion of Canada, being the British North America Act, 1867, out of date?

Recent decisions by the higher Provincial courts of law, the Supreme Court of Canada, and the Privy Council all give point to the question.

In other words, is a hard and fast written constitution drafted in the eighteenth century of the nineteenth century, long before the days of the automobile, radio, airplane, and modern big business suitable to our present twentieth century needs? Nay more, is the present distribution of powers and authority as between the Dominion Parliament on the one hand, and the various Provincial Legislatures on the other, the best arrangement under which to carry on our public business today, not to mention possibly even more complicated developments of the years to come?

Unlike Great Britain, which has no written constitution but is governed by a Parliament guided by precedent built upon precedent down through the ages, and which is, therefore, free to meet changing conditions as they change, Canada is bound by a formal document.

Furthermore, among all the self-governing Dominions of the Empire, Canada alone does not possess the power to amend its own constitution. That power rests solely with the Parliament of Great Britain.

The constitution of Canada was drafted just as the great American civil war was drawing to a close, and the Fathers of Confederation had ever in mind the conflict which arose in the republic to the south between the Federal authority and the advocates of State rights. The constitution of the United States is founded in principle of State rights, and the Federal Government has authority in regard only to those matters specifically delegated to that Government. Where no specific delegation of authority as between the Federal and State authorities is made, then the authority automatically rests with the State. The Civil War resulted from the contention of the southern states that the Federal authority was interfering with and usurping certain of their State rights.

The Fathers of Confederation consequently drafted the B.N.A. Act on exactly the opposite principle. In Canada, the rights and powers of the Provinces are distinctly set forth and limited, and all matters not so specifically stated belong of right to the Dominion.

There are, however, certain subjects in regard to which authority is divided, as, for example, incorporation of companies. The Provinces possess the power to incorporate companies for purely Provincial purposes, while the Dominion can incorporate for Dominion purposes. Both are intensely jealous of their rights in this respect, and, as a result, there is continual dispute. For example, most Provinces are anxious to curb the stock-selling activities of corporations, and to bring them under strict government supervision and control. They have, therefore, enacted what are commonly termed "blue-sky" laws. But the Dominion has contended that such laws cannot apply to Dominion incorporated companies. The result is that any company desirous of evading such Provincial restrictions takes out a Dominion charter.

There has now arisen a dispute between the Dominion and the Provinces as to which authority can exercise control over radio broadcasting and reception. The Dominion has exercised that right to date, but it is now challenged by the Provinces. Suppose it should be established by a Privy Council decision that the Provinces are in the right and the Dominion wrong under the old B.N.A. Act, would it be a good thing for Canada to have radio control cut up into nine pieces?

As a matter of fact, in a country of immense distances, divided by natural geographical barriers, it is not one of the handicaps of our national life that, in regard to many matters, lack of unity exists because of Provincial jurisdiction in such matters which would be overcome through unified Dominion control?

On the other hand, there is the tendency on the part of Ottawa to take control over, or interfere with, subjects which are clearly matters for the Provinces. Constitutionally speaking, such a matter as Old Age Pensions belongs to the Provinces, but by enactment the Dominion Parliament decreed that it would constitute a certain proportion of such pensions if the Provinces adopted the plan. Some of the Provinces have done so; others have not. Such a pension system once established by a Province cannot easily be done away with, but there is nothing to prevent the Dominion Parliament from repealing its enactment at any time, thus leaving the Provinces to face the whole of the financial burden. Similar action has been taken at times by the Dominion in such matters as highways construction, technical education, and grants for this and that. Provinces have embarked on these enterprises, only to have Dominion assistance withdrawn later, to the financial embarrassment of the Provinces.

The question that naturally arises is: Has the time not arrived when the constitution of Canada should be overhauled and brought up-to-date? Should not representatives of the Dominion and of the nine Provinces meet in conference and consider the whole subject with a view to clarifying the atmosphere and removing so many of the causes of present constitutional uneasiness before the country? And is Canada not just as capable of amending its own constitution as is Australia, South Africa, or the Irish Free State? Or must we remain in the eyes of the rest of the world as an inferior Dominion?

Fortunate Winners

H. F. Underwood, of Palatka, Fla., himself won a golf cup he had sold to a club, although he had never played the game before. Almost as good as the incident at the Horticultural Society Show in Bradford, Ontario, last year. Two sweepstakes prizes were offered by two members of the directorate, and each won the prize donated and designated by the donor.

No Argument

Jones had occasion to reprimand his wife. "I think, dear," he said soothingly, "that you fib a little occasionally." She immediately became indignant. "Well, I think it's a wife's duty," was her response. "Wife's duty?" he echoed, wondering what was coming. "Yes," to speak well of her husband occasionally," came the reply.

Suffered From Heart Trouble

Became Weak and Run Down Mrs. Wm. Diette, Glenside, Ont., writes: "For long periods I suffered from heart trouble, and became very weak and run down. I tried various remedies, but they did me no good. One day I met a friend and told her of my trouble. She said she had had heart trouble for two years too, but after using Milburn's Heart and Nerve Pills for a short time she had been relieved of her trouble, so I got two boxes and after taking them I was again feeling fine, and always recommend them to anyone complaining of heart trouble."

The Cutworm Menace

Pale Western Cutworm Eggs Are Hatching in Infested Areas

A recent examination of fields in the area expected to be infested with pale western cutworm has shown that in some cases the eggs are beginning to hatch. This is especially true in the areas that have recently been visited with light rain or snow followed by warm weather.

The hatching of these eggs at this time will answer the question that has been in the minds of many farmers regarding the effect of the open winter on the pale western cutworm. There seems to have been a general impression among the people in the infested areas that the peculiar winter would effectively control the cutworm. This was to be expected either by the eggs being killed or the eggs hatching during the winter and the cutworms being killed. There is very little evidence from experimental work to show that either is possible.

The presence of pale western cutworms in the field can be easily determined in those fields which have some vegetation such as wild oats, volunteer grains, grasses or weeds present. The young cutworms feeding on this vegetation will eat holes in the leaves and some leaves may be cut off above the ground. The evidence of feeding is much easier to find than the cutworms themselves since they are at present very small and inconspicuous.

Fields which have such vegetation showing signs of cutworm feeding can not be seeded to crop with any hope of having it mature in the season turns out to be exceptionally well. Such fields might better be cultivated thoroughly and worked up as first class summer fallow for next season. Where this land cannot possibly be worked up, the cutworms should be cultivated thoroughly throughout the early spring and seeded to late barley or oats after the middle of June. The date of this seeding will depend on whether or not cutworms are still active in numbers in the field.

Information regarding the pale western cutworm may be obtained by writing to the Dominion Entomological Laboratory at Lethbridge, Alberta; Saskatoon, or Indian Head, Saskatchewan; Treesbank, Manitoba; to the University of Alberta at Edmonton; the University of Saskatchewan at Saskatoon; or the Provincial Departments of Agriculture at Regina or Edmonton.

FASHION HINT

"How to make my old short skirts conform to the new length was a problem to me until I got this plan. I dropped the hems; and as the part that had been turned under dried under the rest, I redyed the entire dress, after having bleached the goods, following directions in Diamond Dyes package. "I used Diamond Dyes for the redyeing, of course. I have dyed many of my things with these wonderful colors. They have saved me many dollars and have never failed to give perfect results—amazingly so. —fast to wear and washing. Friends think my things are new when I wear them. They do give the most gorgeous colors!"

Mrs. G. C. Lewis, Quebec.

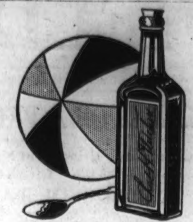

American Penetration

Americanization of British Amusement Industry Discussed Americanization of the British amusement industry was discussed in British House of Commons with half a dozen members hurling troubled questions at Rt. Hon. William Graham, president of the board of trade. They asked him if he knew the American Telegraph and Telephone Company and the Western Electric group, through subsidiaries, recently obtained control of the Gaumont British corporation, one of the largest producers and exhibitors of motion pictures in England, and were engaged in an Americanization programme.

Choked For Air. Some little irritant becomes lodged in the bronchial tubes, others gather, and the awful choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has helped it years of success. It is the sure remedy for every sufferer.

The Miracle Of A Building "A building is one of the unrecognized miracles. It comes to us out of the unseen. God and man build it together. The wood which forms its substance is a part of the life of great forests; the mind, which sees its form, fashions its visible structure out of invisible material; the hands which build its frame have the skill of creative workmanship; the life it enshelters crowns it with meaning and purpose. Great is the mystery of a building."

W. N. U. 1888

If baby has COLIC

CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coated, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Deplores Child Labor

Says Canada Not Fulfilling Provisions Of Versailles Treaty

Charges that Canada was not fulfilling provisions to protect labor, as laid down in the Versailles treaty, were made last night by J. S. Woods, Labor M.P. for Winnipeg North, at the annual meeting of the League of Nations Society at Toronto.

Clauses covering an eight-hour day, minimum wages commensurate with the living standards of the country in which the worker lives, elimination of child labor and the right of labor to organize, had not been lived up to, he claimed.

According to the census, he said, Canada employed almost twice as many children as the United States. Of every 1,000 persons engaging in gainful occupations, 23 were under the age of 16, while in the United States only 13 under 16 years were employed per 1,000.

Alberta Railways Act

Measure To Extend Time For Two Years For Completion Of Northern Road

Third reading was given in the House of Commons to a bill respecting the Northern Alberta Railways Act.

The object of the measure is to extend the time for two years for the commencement and completion of the main line of the Edmonton, Dugrean and British Columbia railway from Spirit River, Alberta, "by the most feasible route and in a generally westerly section, a distance of 102 miles, more or less, to a point in townships 78 or 79, range 18, west of the sixth meridian in British Columbia"; and for a branch line of the Central Canada Railway from near Grimshaw, Alberta, in a northerly direction to the northern boundary of Alberta.

It Testifies For Itself.—Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for coughs or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that the medicine proves itself and needs no guarantee. This shows why this Oil is in general use.

Awarded Research Council Bursary Miss Edith May Lyons, of the department of zoology, University of Manitoba, has been awarded a bursary by the National Research Council of Canada. Miss Lyons is qualifying for her master of science degree this spring, and will continue with post-graduate research work at the University of Toronto next year.

Sweden's railway electrification programme is expected to prevent a national unemployment problem for at least two years.

Presented With Horses

Mounted Policemen At Empire Trade Fair At Buenos Aires Receive Gifts

Four Royal Canadian Mounted policemen now on duty in the Canadian pavilion at the British Empire trade fair in Buenos Aires, have each been presented with two riding horses for their personal use. A cable to this effect, received at the Department of Trade and Commerce from Buenos Aires, does not make known the donor of this munificent gift but it is believed the eight horses were presented by the Argentine government.

The four members of the R.C.M.P. sent to the trade fair are: Sergt. J. R. Paton, M.C., of Victoria, B.C.; Constable Carstairs, of Medicine Hat, Alberta; Constable Carmichael, and Constable C. G. Fairman, both of Ottawa.

Previous reports from Buenos Aires said the four "Mounties" had captured the popular fancy in Argentina, a country noted for its horsemen.

Recipes For This Week

(By Betty Barclay)

COCONUT CABINET PUDDING
5 egg yolks, slightly beaten.
5 tablespoons sugar.
1/2 teaspoon salt.
2 cups milk.
1 tablespoon gelatin.
1/4 cup milk.
1 teaspoon vanilla.
Lady fingers or strips of cake.
1 1/2 cups apricots, sliced.
1 cup coconut, southern style.

Combine egg yolks, sugar and salt with 2 cups milk and cook in double boiler until mixture coats the spoon, stirring constantly; soak gelatin in 1/4 cup milk 5 minutes and add hot custard. Stir until gelatin dissolves. Add vanilla. Strain custard into mold, filling 1 1/2 inches deep. Chill until firm. Dip lady fingers into part of custard mixture and line sides of mold. Fill center of mold with alternate layers of apricots, remaining custard and coconut. Chill until firm. Unmold. Garnish with additional apricot halves, whipped cream, and strips of angelica. Serves 8.

Wood Buffalo Park

More Than 1,500 Buffalo Counted and Photographed in Aerial Survey

More than 1,500 buffalo were counted and photographed in the Wood Buffalo Park, at the junction of the Saskatchewan-Alberta boundary and the North West Territories, by the aerial survey of the graying lands of the far north, just completed. There was no attempt to photograph the whole herd in this census, which was in the nature of a preliminary test and experiment.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Expeller will clear the stomach and intestines and restore healthfulness.

B.C. Peach Culture

It is expected that about 20,000 new peach trees will be planted in the Oliver district of British Columbia this year.

Development Of Canada's Water Power

Figures Show Capital Invested Runs Into Millions

The capital investment in water power development in Canada was estimated by the Dominion Water Power and Forestry Bureau, Department of the Interior, to amount to over 1,380 million dollars on January 1, 1931. The last year for which official figures are complete for all industries in 1928, and these show that the amount of capital invested in water power was exceeded only by that in agriculture and in steam railways.

May Harness Natural Gas Going To Waste In Turner Valley To Generate Electric Power

Millions of feet of natural gas now going to waste every day in the Turner Valley, Alberta, may be harnessed to generate electric power for industrial and domestic purposes. A proposal to do this has been submitted to the Alberta Government by a British corporation, according to press reports. It is stated that the corporation offers to spend \$10,000,000 on the project at the outset and a total of \$100,000,000 within 15 years and to begin work on the construction of a plant within 90 days from the time the approval of the Alberta Government is given to the proposal. The plant will be capable of generating 70,000 horse power of electricity within a year.

The plan for this new project, as outlined, is to collect the waste gas in Turner Valley into one pipe line running to the power house where it would be used to turn specially-designed turbine wheels for the generation of electrical power which a market would be secured in industrialization of southern Alberta. The power house would be located at a point probably 30 miles east of Turner Valley and not far from the border of the United States. The gas is escaping and not being put to use, to supply the corporation with such gas at a price to be fixed through the Public Utilities Board. In consideration for the establishment of such a plant as proposed, an exclusive franchise for a period of 99 years to the corporation is requested. Provision would be made, if desired, for the Alberta Government to take over the plant on an equitable basis at some time in the future.

The scheme for utilization of the Turner Valley and other waste natural gas would produce electric power at a cost of about three-tenths of a cent per kilowatt-hour.

Blind Will Benefit

By New Invention

Instrument Produces Raised Letters From Ordinary Pages

Robert E. Naumburg, of Cambridge, Mass., has demonstrated for the first time a "printing visagraph," an instrument that produces magnified, raised letters from the pages of ordinary books.

The visagraph reproduces large, embossed letters on a wide roll of thin aluminum foil, with the result that the finished product corresponds in some respects to the Braille system. Naumburg estimates his machine will increase the reading range of the blind a thousand-fold.

A Brain Investigator

A tube of a brain business man can slip over his head to give his brain cells an invigorating diet of electrons was one of the wonders of science presented to the convention of the American Electro-Chemical Society at Birmingham, Alabama. The same tube, J. A. Lee, connected with a trade publication, explained, can be used to reduce fever.

A Quick Thinker

Farm labourer, to hiker (recognizing Farm labourer, to hiker crossing a field: "Didn't you see the notice saying pedestrians ain't allowed here?" Hiker (with great presence of mind): "I'm not a pedestrian. I'm a Congregationist!" Labourer: "Oh, that's different. You can go on."

Manager: "I have just signed a contract for you to appear against Smith." Champion: "I can't box him—he's an enemy!"—Buen Humor, Madrid.

W. N. Y. 1920

FARM MANAGER

Saskatchewan Coal Mining

New Regulations Governing Leases Are Made Public

Reduction in the maximum, and increase in the minimum areas allotted to any one lease is provided for in the new coal mining regulations as published in the April 18 issue of the Saskatchewan Gazette.

Under the old Dominion government regulations the maximum area allowed was 2,500 acres, while the minimum was 20 acres. Only one location was allowed to any one person.

The new regulations provide for a maximum area of 640 acres in any one location, but provide for three locations to a person. Thus the total area provided for under the new scheme is 1,920 acres. The minimum size of a location is 40 acres.

There are little other changes in the regulations, except that under the present plans, any lessee must have a clear sheet with the department before he can obtain a new location or have an assignment registered.

Good Seed Pays For Itself

Grain With Fine Record Of Production Finds A Market

We have heard of an Eastern farmer who sold a great deal of his wheat for two dollars a bushel. We did not hear the price at which he sold a great many of his oats, but the figure was a decidedly fancy one for this season.

The secret? He sold wheat and oats with a fine record of production behind them. Nor was that all; he found out customers who wanted a really good thing and had sufficient cash to pay for the same. This year as in other years, the man with a really good article to sell who makes his article known to the public has little difficulty in making good sales. There is still another secret in this affair. This farmer kept his eyes open for good seed himself and bought liberally of varieties that had a record of achievement behind them.

Measurements Accurate

Geodetic Survey Of Canada Made By Line And Triangles

Accurate measurements can be made across country by means of a measured line on the ground and a system of triangles. The triangulation of the Geodetic Survey of Canada, Department of the Interior, is conducted with the greatest degree of accuracy. Its usage involves the determination of the size and shape of the earth, the location of international and provincial boundaries, and furnishes points of control for the general maps of the country. Adjusted geodetic points in great numbers are available to the public in every province of the Dominion.

MERINGUE OF RICE

Put a cupful of rice into a pint of boiling water, and when the water has boiled away add a pint of milk, a piece of butter the size of an egg, four eggs and the grated rind of a lemon. Beat, a pudding dish, pour in the mixture and bake until it sets. Beat the whites until dry, add half a cup of sugar and a tablespoon of lemon juice. When pudding is done spread it frosting over it and brown light on top.

The American golden plover, which breeds in Arctic America, migrates the entire length of North and South America, wintering in Patagonia.

Trans-Canada Highway

Desirability Of Linking Up East With West Is Foisted Out

The desirability of linking up the incomplete portion of the trans-Canada highway is the subject of a letter sent to Premier R. B. Bennett recently by the western division of the Canadian Automobile Association.

The association stresses the fact that hundreds of thousands of Canadians, regardless of politics, realize the vast possibilities in the completion of the highway at the earliest possible time, because it will provide an artery for a tremendous volume of tourist traffic which now must make use of the United States highways in their passage from east to west.

"There is no estimating the number of Canadians," the letter reads, "who are looking to the day when the Big Bend connection between Revelstoke and Golden, B.C., will be completed. But they are more in doubt in regard to the 500-mile span in western Ontario, which may be regarded as the bridge between the east and west."

Canadian Zinc To Europe

Twenty-Three Cars From Northern Manitoba Shipped To London and Hamburg

The largest shipment on record of made-in-Canada electrolytic zinc is en route from a large smelting plant in Northern Manitoba to London and Hamburg. The shipment was composed of a 23-car train destined to Halifax, Nova Scotia, thence overseas. Fifteen cars are billed to London, and the remainder to Hamburg.

Since the first shipment left the smelting plant at Flin Flon last November, no less than 247 cars of blister copper and zinc have been shipped. Of this total 99 cars have been blister copper and 148 have been zinc. Most of the shipments have been consigned to eastern Canadian centres and to the United States.

Grist Mill For Moose Jaw

Western Grist Mills Limited of Moose Jaw has started the erection of a 100 barrel mill and expects having it completed in time to handle the 1931 crop.

Trade With China

Canadian Products and Exporters Held In High Regard In Shanghai

Canadian trade with China has suffered less than that of most other countries from the general world depression, according to Lieutenant-Colonel L. M. Cosgrave, Canadian trade commissioner at Shanghai, who is in Vancouver to spend several weeks conferring with importers and exporters and to make an intensive study of coast and western products suitable for the Chinese trade.

Canadian products and Canadian export houses are held in high regard in Shanghai and other parts of China. Their standing is at least equal to that of any foreign country and there is a distinct feeling of friendliness which augurs well for the future, Colonel Cosgrave reports.

"In the past six months there has been more inquiry for Canadian products than in any six months in the past five years. With conditions as they are this can only be regarded as most encouraging," he said.

Frog Farm Builds Up World Trade

Was Started Eight Years Ago On Outskirts Of Vancouver, Washington

A frog farm on the outskirts of Vancouver, Washington, has proved to be such a success that the owner is called upon to deliver frogs faster than the frogs come up out of their winter hibernations in the mud to be shipped to New York or perhaps Australia.

Since the farm was started eight years ago, two of the biggest patrons have been Florida and Louisiana, which were former prolific in frogs. Much of the trade of the farm is in sending pairs of mature frogs for the purpose of starting other frog ponds.

Superbulous Words

"Her observations covered 148 schools in fifteen different States. Why 'different'?"

"Personally, I don't think so." Why "personally"? Do you mean that of Scitully you do think so? "This line is to be linked up with that one." Why "up"?

FASHION

No. 272—For Smart Matron. This style is designed in sizes 38, 40, 42, 44, 46 and 48 inches bust measure. Size 36 requires 4 1/2 yards of 36-inch material with 3/4 yard of 10-inch lace and 3/4 yard of 36-inch lining.

No. 223—Jacket Suit. This style is designed in sizes 14, 16, 18, 20 years. Size 38 requires 3 1/2 yards of 36-inch material for jacket and skirt with 1 1/2 yards of 36-inch material for blouse and jacket bands.

No. 240—Expresso Good Taste. This style is designed in sizes 16, 18, 20 years. Size 38 requires 4 1/2 yards of 36-inch material with 3/4 yard of 10-inch lace and 3/4 yard of 36-inch lining.

No. 244—For Wee Maiden. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1 1/2 yards of 36-inch material.

Preparing Attractive Display

Quebec Is Taking Large Space At World Grains Show

His Excellency the Governor-General has consented to act as chief patron of the world grain exhibition and conference which will take place at Regina in the summer of 1932.

One of the most attractive displays in the educational section of the exhibition will be the sixteen-ton display of Quebec. It has been decided to take a space of 200 feet frontage in the exhibition building in order to give the thousands of visitors an idea of the agricultural activities of Quebec.

The centre feature of the exhibit will be a Quebec farm, complete with buildings, live stock, fields, sugar bushes, etc., flanked on either side with exhibits of natural resources of the province, including mineral, lumber, power development, handicraft and manufacturing products.

Argentina is the sixteenth country to officially accept the invitation of the Canadian Government to attend the Exhibition and Conference. The complete list of participants at present is as follows: Italy, Peru, Yugoslavia, Guatemala, New Zealand, Czechoslovakia, The Netherlands, Belgium, Poland, Spain, India, Portugal, Switzerland, Estonia, The Philippine Islands and Argentina.

No Hearsay Evidence

Court Case That Was Settled In Common Sense Way

It is well to see things done in a sensible way. To illustrate: In an Eastern city there was a queer case in court. One farmer claimed that a fire started in the bush by his neighbor, had spread to his property and had spoiled the land by burning off the top part of the soil.

Instead of arguing for days, officials, solicitors, and witnesses, took a trip out to the property in question, and along with them they had spades and shovels. They actually went to work and gouged holes in the ground to see if the damage was as serious as claimed, and to find out exactly what had taken place. Returning to court, the decision was made that the fire damage claim had not been sustained.

That was direct action and common sense.

Not Looking For Miracles

Western Farmers Will Fight Way Back To Prosperity

"Twenty-five years from now we will be growing a good head more wheat than today, and selling it in the world markets," said Hon. Duncan Marshall, one-time minister of agriculture in the Alberta Government, addressing the Eastern Canada Livestock Union at Toronto.

"Taken as a whole, I can say to you that the farmers in the Canadian West are not looking for any miracle to happen, or anybody to turn exactly what had taken place. They are going to win through to better days, as they have fought through earlier depressions," he declared. Mr. Marshall had just returned from a month's motor tour through the West.

Did Not Choose To Speak

A young woman who wished to engage Calvin Coolidge in conversation, when he was president, told Mr. Coolidge that her father had laid a wager that she couldn't get him to utter three words. She expected that this would start him talking. But he said quietly: "Dad wined."

"According to the committee of the National Research Council on tuberculosis research, much work remains to be done before the problems of an effective vaccine against tuberculosis are solved."

This statement was issued following an important conference on the subject in Ottawa, in which the leading doctors specializing in the study of tuberculosis took part.

The statement sets forth that the committee agrees "B.C.G." confers a degree of resistance to tuberculosis but the nature and extent has not been fully demonstrated. Further studies are to be conducted to clear up these points definitely. About 1,000,000 infants have been vaccinated against tuberculosis. "B.C.G." is the vaccine of the Pasteur Institute of Paris.

The statement describes the work accomplished as follows: "B.C.G." (named after Prof. B. Calmette, the director of the Pasteur Institute and his colleague, Guérin), has to date been used in various countries to vaccinate a total of approximately 1,000,000 infants against tuberculosis.

In the effort against bovine tuberculosis it has been put forward as a preventive measure that would eventually make unnecessary the expensive method now commonly employed of destroying animals reacting to the tuberculosis test.

"Canadian researches on tuberculosis have been widely discussed in both Europe and America, particularly those of Dr. E. A. Watson, of the animal diseases research station, Dominion Department of Agriculture, at Hull, Que., who has challenged claims put forward by Calmette; Dr. A. C. Rankin, of the University of Alberta, and Dr. J. A. Baudouin, of the University of Montreal, whose work has tended to support Calmette's contentions, and Dr. G. B. Reed, of Queen's University. Dr. Watson and Dr. Rankin have carried on extensive experiments with cattle, and Dr. Baudouin has supervised the inoculation and study of infants in Montreal.

"Dr. Reed has recently made an important contribution to the knowledge on the subject and will publish his results shortly."

Dr. R. S. Ferguson, director of the Fort Qu'Appelle, Sanatorium, Fort San, Sask., reported on the tuberculosis investigation that has been carried out under the auspices of the committee among the Indians of that district. He said that a family history of the Indians showed that within three generations there had been death from tuberculosis in nearly every family on the reserve. The worst tuberculosis epidemic was between the years 1880 and 1905. To indicate the effectiveness of the work that was now being done, Dr. Ferguson reported that, while the incidence of tuberculosis among the Indians in 1928 was twenty times that of the surrounding white population, it was today only thirteen times, a reduction of one-third during that period.

Dr. H. M. Tory presided at the conference and 25 men and women engaged in the study of the disease took part.

Increase In Poultry

Value Of All Poultry In Canada Placed At Fifty-Four Million Dollars

Poultry keeping is on the increase in Canada. The total number of poultry on the farms in the Dominion at the end of last year was estimated at 60,795,000, of which \$6,247,000 were hens and chickens; 2,389,000 turkeys; 1,160,000 geese and 889,000 ducks. The value of all these birds is placed at \$54,853,000. Two years ago the total number of poultry was \$3,779,000. Poultry are successfully raised commercially in all of the provinces of Canada. The principal centre of the industry is the Province of Ontario.

"Do I know the business? Rather. I was very useful in the last place—it was I who used to call out to the others, 'Hush! Here comes the boss.'" —Pages Gates, Evardon.

SCIA?!

Here is a never-failing form of relief from sciatic pain:

Take Aspirin tablets and you'll avoid needless suffering from sciatica—lumbago—and similar excruciating pains. They do relieve; they don't do any harm. Just make sure it is genuine.

For Mental Health In Canada

Increased Facilities For Care Of Sub-normal People Are Urgently Needed

(By John Burke Ingram)
If all the insane people of Canada were brought together in one place they would form a city larger than Kingston or Kitchener. According to recently compiled figures, there are 29,528 patients in Canadian mental hospitals. These figures include, of course, those suffering from mental diseases. Year by year their numbers increase. The Canadian people have invested nearly \$75,000,000 in buildings and equipment, and spent about \$10,000,000 each year in maintenance costs. In every province the hospitals are crowded to capacity; and it is safe to say that there are as many persons attempting to carry on in the community who are in need of treatment as there are in the hospitals at present. There is a crying need in Canada for the establishment of psychopathic hospitals and outpatient clinics to deal with these cases before they become chronic and beyond hope of improvement.

"Many people are more or less familiar with insanity, but comparatively few realize the difference between the insane and those persons who are known as mental deficient. A sufficient definition for the present purpose is that insanity may be termed a 'prolonged departure from the individual's normal standard of thinking, feeling and acting; while a mental deficient is a person whose mind, through hereditary causes, or through pre-natal or infantile misadventure, has failed to develop normally."

Mental deficient, or defective, range in intelligence from the idiots and imbeciles, familiar to all, to the more nearly normal morons, or feeble-minded persons whose presence in the community is not so readily detected.

These latter are the great social misfits. They contribute out of all numerical proportion to the problems of delinquency, criminality, promiscuity and illegitimacy. As children they are "backward." They are slow in learning to walk and to talk; in some cases they are from two to four years behind other children of the same age. Shamed of their non-progressive, they eventually drop out of school and go into the world unequipped to meet the demands to be made upon them as citizens or as parents. Adult in size and years; it is not generally realized that they are not responsible for their actions; and it is not strange that they fail to meet the requirements of our present system of law. Repeatedly and themselves in the jails, the reformatories and the houses of refuge.

Thanks to the efforts of the Canadian National Committee for Mental Hygiene, pioneer work is being conscientiously done towards educating mentally deficient children at a sufficiently early age to permit them to be trained to a certain facility in one of a number of handicrafts. In the hope that they may become self-supporting in their adulthood. It is surprising to learn that many children who might never do more than learn to read and write, are being placed in addition and subtraction can be so trained.

The Canadian National Committee for Mental Hygiene, having no other excuse for its existence and no ulterior end to serve, has taken upon itself the task of bringing home to the people of Canada a realization of the supreme importance of mental health, with the hope that through public demand governments will be stimulated to provide these increased facilities that are now so badly needed.

Horsepower Going To Waste

Electricity Could Be Produced At Grand Falls In Labrador

Four million horsepower of electricity was "going to waste" at Grand Falls, in Labrador, Sir Wilfred Grenfell, famous medical missionary to the coast of Labrador and Northern Newfoundland, declared during a lecture at Montreal. Sir Wilfred said he was attempting to demonstrate to governments that Labrador may be rich in minerals and other natural resources.

Air Telegram Service

Passengers on the German Luft-hansa service between Berlin and Vienna can now hand in telegrams for transmission from the airplane in which they are travelling to ground stations. This service was inaugurated on Feb. 2, with telegrams sent to the Ministers of Communications and Posts.

The trouble with a great many men is they are never satisfied with what they own time.

With the exception of ourselves no one ever does things as they should be done.

Village Of Blind People

Nine Hundred Live Hidden Away In Mountains Of Mexico

A village of 900 people, all totally or partially blind, who never venture from their hut until after sundown was described by Dr. Nigro Rumbautama, Mexican delegate, to the second Pan-American Conference of Directors of Health at Washington.

The village is Tiltipee, in the state of Oaxaca, Mexico. Hidden away in the mountains, it is reached only by a few horse trails. The malady which blinded the inhabitants is known in the medical world as onchocerciasis.

Tests have shown, Dr. Rumbautama said in his speech, that an insect is the cause of the blindness. Eradication of this insect, he added, has given hope in the fight on the malady, of which little is known. There are 30,000 such cases in Mexico.

Aviators Thrill Spectators

Exhibition Of Spectacular Parachute Jumping Staged At Ottawa

As noncommissioned as bathers taking a morning plunge, 12 officers and non-commissioned officers of the Royal Canadian Air Force recently tumbled into space from a height of 2,000 feet in one of the most spectacular exhibitions of parachute jumping ever staged in Canada. The display was remarkable in that every flier who went aloft completed what is probably the most hazardous part of the Air Force training with landings that were perfect or near perfect.

Of the dozen daring aviators who performed the feat, ten were negotiating their first parachute leap.

A Magic Soap

How the Fairy Queen's Christening Gift Was Found

Once upon a time the Fairy Queen was asked to be God-Mother to a very important Baby Princess and wanted an especially nice Christening Gift. So she sent her five cleverest Elves to fly all over the world in search of wonderful scents and rare perfumes and rich oils. They found a soap that would make the Baby Princess as lovely as the day is long.

Well the first Elf flew to France and Algeria, and Bulgaria, where the loveliest roses grew, and asked them to give their pretty fragrance to his Magic Soap. And the roses showered their sweet petals into a big sack the Elf had brought with him. And he went on and gave a lovely perfume.

The second Elf flew to Africa, and there she made friends with the king's daughter, who gave her cloves and Yew-tree, that is a sweet root—rather like our sweet grass. And the third Elf went to India and found the Panchalanga plant whose leaves smell something like mint, and the pretty yellow wood of the sandalwood tree, which is very fragrant. But the fourth Elf had the most dangerous time, for she daintily flew to an island near Italy called Sicily, where there lived some fierce fruit called Bergamots, who were very nasty and disagreeable, but nevertheless were exquisitely perfumed coats. The Elf crept up the whole tree, which was so tall, and slipped off a bit of their coats here and there where it was so ripe, and missed—and was just tipping away when a big fat Bergamot awoke and with a great yell prepared to catch her and crush her. But the Elf called to the Flower Fairies to help her, and they rescued her and hid her beneath a toad-stool till the Bergamots had gone to asleep again when she scampered off home with her treasure.

On her way she met the fifth Elf who had clear golden hair and came from Coochin China, and stately scented gums from the East Indies.

And when they had all come back they found that the Palace Pussycat who wanted to help his mistress had been all the way to Abyssinia (that is Bible Story Land), to see a cousin of his, the Civil Cat, who carries a delicious perfume with him in a tiny bag and had gladly given it to Pussycat; and Cliv had kindly introduced the Fairy cat to a Chinese friend of his, the Musk Deer, who had some rare scent in a secret sack under his tummy which he also gave for the Christening Gift.

How pleased the Fairy Queen was! Quickly she carried all the wonderful things to a Mortal friend of hers who was a soap maker and he worked with his helper and his wife and produced the most wonderful soap he had ever made just in time for the Christening.

And the Princess grew up so beautiful that she married the richest and handsomest Prince that ever was, and on her wedding day when the Fairy Queen came to see her, she said: "Dear God-Mother, couldn't you ask your friend the Soap-Maker, to make heaps and heaps of my wonderful soap and give it to all the little folk and all the big folk in the world. I feel so selfish enjoying it all myself."

"That is a good kind God-Daughter," said the Fairy Queen, and she told the soap maker, who promised to do as the Princess wished.

And he went on making the Magic Soap all his life, and after that his son and his grandson went on making it. And you know how lovely your Baby's Own Soap, and it is because it is made of the perfume oils from all the wonderful plants and flowers that the five Elves found all over the world that it smells so sweet and makes such heaps of creamy bubbles and helps little folk and big folk to grow as lovely as the day is long.

Let these 6 vital Salts rid you of PIMPLES

Would you like quickly to free yourself of those hideous pimples—and have that smooth and soft skin perfection you've always envied?

Do you want to have eyes as dazzling and bright as water dancing in a summer sun?

Will you like to enjoy glorious health with plenty of energy and possess a keen mind?

Then take a quarter teaspoonful of Kruschen Salts in a glass of hot water every morning before breakfast!

Kruschen is a combination of the six vital salts which your nerves, glands and body organs ought daily to receive from food if they're to function correctly and which are impossible to obtain in these days of modern cooking.

Kruschen swiftly clears your blood of those harmful acids which cause your skin to erupt—you'll possess skin like velvet, and a health perfection you didn't think possible!

Planning Bacon Plant For Saskatchewan

Equipment Has Been Secured and Foundation Stone Purchased

Recent press despatches indicate that ambitious plans are under way for the establishment of a bacon curing plant in Saskatchewan. A Prince Edward Island syndicate has purchased a three-quarter section farm close to Long Lake, Strathburg, Sask., for the purpose of producing, raising, and slaughtering hogs, and curing and shipping bacon to England. It is stated that buildings capable of holding 5,000 hogs are being erected. The necessary machinery and equipment has been secured, and a shipment of pure bred Yorkshire hogs has been purchased and shipped to Long Lake. It is expected this fall that 2,500 sides of Wilshire bacon will be available for shipment.

A native of Denmark, thoroughly conversant with hog production and marketing as carried out in that country, has been placed in charge of the plant.

Sugar From Weeds

Scientists Find That Dandelions, Golden Rod and Other Plants Yield Sugar

Weeds like dandelions and golden rod contain these newly-discovered sugars valued by government chemists at \$50,000 a pound.

The Bureau of Standards in announcing this discovery recently, said the sugars were not previously known to science. They were found by Dr. R. F. Jackson of the bureau and his assistant, Miss Emma McDonald, while studying the amount of levulose or fruit sugar that can be obtained from lulin. Lulin is a white starch-like substance, found in the roots of golden rod, dandelions, Jerusalem artichokes, dahlias and chloery. Dr. Jackson found that inulin is 92 per cent. levulose, a sugar many times sweeter than ordinary cane or table sugar, three per cent. glucose, like corn sugar, and the remaining five per cent. is made up of the new triplets of the sugar family.

"Life is God's sacramental gift to man for his enjoying—The talent given into his care For his soul's exercising. A sacred trust bestowed on him For his immortalizing. And he who lends will one day ask His own again with interest. See to it that thou be found Of those who failed him in the end."

—John Oxenham.

"Lord, here is thy pound," the third one said, "which I kept laid up in a napkin." And then he excused himself by accusing his lord of being an austere man who would require him to make up whatever loss there might be and would keep whatever profit he might make, so that he himself would be no better off for all his labor or trouble. "Thou takest up that which thou layest not down, and ransomest by being alive, didst not so; these were proverbial sayings applied to grasping persons."

—Pine forests that were a rich source of amber once spread over northern Europe.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE
MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but allows the full sunlight to enter, including the giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Your chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Quickly Ends Itch of ECZEMA

"My baby had a bad case of eczema. But we used a little of 'Eczema-Salve' and it was gone in a few days. 'Eczema-Salve' ends it at once. All druggists."

Vaccine For Common Colds

Report Of Interesting Experiments Being Conducted At Columbia University

Hope for a vaccine to prevent the common cold has been found at the Presbyterian hospital of Columbia University medical center.

The vaccine-making stage has been approached through use of an artificial cold produced in the laboratory—a real cold purified so as to be stripped of many uncertainties that ordinarily hinder the making of discoveries.

This work and the research leading up to it are described in a paper by Doctors A. B. Doehs, K. C. Mills, G. S. Shiley, and Yuse Kozelch, Jr., in the Courier, official publication of the International Catholic Federation of Nurses. The research is financed by the Chemical Foundation, Inc.

At first real colds were given to chimpanzees until Dr. Doehs and his associates felt quite sure that no known ordinary bacteria cause colds, but that they only become aggravated, active and often dangerous as a result of a virus which is the real cause.

The synthetic colds were produced by infecting the "chimps" with nasal washings completely purified of disease bacteria, and which presumably contained only the filterable virus.

Exposure of these synthetic infections produced in 50 per cent. of the chimpanzees colds "exactly similar in all respects" to real colds. Tried on human beings the artificial cold performed with precisely the same percentage and effects.

"The experiments lead us to certain definite conclusions," says the paper. "The contagious cold in human beings is due to an invisible agent which passes readily through filters which hold back all ordinary bacteria, and in all likelihood, belongs to the group of so-called sub-microscopic viruses."

"The next step in the investigation is to try to grow the virus of the common cold in the test tube outside the human body. Should this be successful, and there is already reason to think that it may be, the way will be opened for the preparation of a vaccine which may prove useful in prevention of common colds."

Best For You—Baby too When Granny was young she used:

BABY'S OWN SOAP

Then a New-bleeding Canadian Soap For Toilet and Nursery.

Best For You and Baby too. Sold in bulk and cartons. 2-40 ALBERT SOAP CO. LTD. - MONTREAL.

OTTAWA PASSES ESTIMATES FOR PUBLIC WORKS

Ottawa, Ont.—The House of Commons buckled down and spent a solid day discussing and voting supply. Public Works Department estimates were under consideration, with particular reference to votes for public buildings in Ontario and the West. While there was plenty of criticism from varying angles, fair progress was made. When the House rose a total of \$2,239,150 had been voted, covering appropriations for the provinces of Ontario, Manitoba, Saskatchewan, Alberta, and British Columbia. When adjournment came the House had under consideration the general appropriation of \$562,300 for buildings in different parts of the Dominion.

Estimates for public buildings in Ontario, totalling \$1,378,400, were passed. The corresponding vote a year ago was \$2,616,323 and of this, \$179,000 was revoked. The estimates include \$670,000 for the Toronto customs building.

A. L. Beaulieu (Lib., Provencer), aired a grievance when the Manitoba vote was called. The 1930 estimates passed by the King administration contained \$12,000 for a post office at Dominion City, Man. After the change in governments, the work was not proceeded with.

Hon. H. A. Stewart, minister of public works, stated that the course followed in this instance had been sound. The member himself had said that the annual estimate would be \$1,300. The salary of the postmaster would absorb this sum and the post office would then have to be maintained, interest paid on the money, repairs made and there would be a general debt against the building.

A. A. Heaps (Labor, Winnipeg North), agreed with the minister of public works in opposing the election of public buildings which did not produce revenue.

The House then approved the appropriation for public buildings in the province of Manitoba which totals \$81,700.

Proceeding to the Saskatchewan appropriations which total \$176,050, the House quickly ran through the individual items. They include, \$38,000 for a public building at Watrous, \$25,000 for a public building at Kam-sack, \$22,000 for one at Lumsden, and \$31,000 to pay the third instalment on the purchase of the Regina armories.

A protest against reduced estimates in the prairie provinces, as compared with amounts provided in Eastern Canada, was voiced by T. F. Donnelly (Lib., Willow Bunch). The unemployment was worse in the western provinces, he asserted, and the provisions for public buildings showed a far greater reduction there than in the East.

Mr. Stewart stressed the large number of claims which have been made upon the department of public works. He had to be very careful in view of the many demands, Mr. Stewart referred to the construction under the previous government of the Immigration hall near McIntosh's constituency. Today this building was not needed and about the only use it could be put to was possibly occupation by the Mounted Police. Discretionary construction must be exercised so that no mistakes would be made.

The estimates for Saskatchewan and Alberta were then passed.

Firmer Hand In India

Believed That Lord Willingdon Will Inaugurate Stiffer Policy
London, England.—Lord Willingdon takes up residence at the summer capital of India this week-end and it is generally believed he will inaugurate a policy somewhat stiffer than that of Lord Irwin.

Sir Geoffrey Montemayor, governor of the Punjab, said recently that the Punjab government's policy of toleration had bred licence, and would not be continued. The Punjab government, he said, would no longer stay their hand, but would deal properly with breaches of the law. The situation in the other Indian provinces is similar to that in Punjab.

Fishing Ships Forfeited
Ottawa, Ont.—Four ships of United States registry are condemned as forfeited to the Crown for fishing with in Canadian territorial waters on the Pacific Coast, under a judgment handed down by the Supreme Court of Canada recently. The judgment confirms the findings of the local judge in admiralty at Victoria, B.C.

W. N. U. 1888

Searching For Lost Explorer

Ship With Airplane Carrying Provisions Has Left Iceland
Copenhagen, Denmark.—A wireless message received at Reykjavik, Iceland, purporting to be from Augustine Courtauld, British scientist who is lost in Northern Greenland, stated: "Absolutely without provisions."

An aeroplane which has left Iceland with the Iceland inspection ship "Odin," will fly from the edge of the ice barrier to Tasloak and to Angmagssalik, searching for Courtauld en route. If the plane can find him it will drop provisions on the ice for his use.

He is believed to be somewhere in the vicinity of the station at which he was left to spend the winter and obtain meteorological data for use of British Arctic air route expedition. The site of this station has not been located thus far by rescue missions which have gone to Courtauld's aid.

Heavy Grain Shipments

Nearly 30 Million Bushels Sold For Immediate Export

Montreal, Que.—Nearly thirty million bushels of grain have been sold for export during the next four weeks, and nearly 50 tramp steamers chartered to carry it across the Atlantic, together with the regular liners. Reports of conditions prevailing during the early part of the St. Lawrence season are steadily improving.

Grain freighters have improved and one steamer was booked last week to carry 50,000 quarters of grain to Havre and Dunkirk during the first half of May at 12 cents a hundred pounds. The rates are below what shippers consider reasonable, though higher than those prevailing during the greater part of last season.

Preparing For Flight

Bert Hinkler, Australia Flyer, Interviewed in Toronto

Toronto, Ont.—Bert Hinkler, skilled Australian flyer, who set the first record for the London-Australia flight in a light machine in 1928, is now at a local airport here, and much confecting as to his immediate plans is being made by local aviators.

Interviewed by a local newspaper, Hinkler did not deny that he was going somewhere, but refused to discuss the matter of a flight.

It is believed, however, that he will suddenly decide to fly to South America, thence across the South Atlantic, or perhaps fly to Australia via Vancouver. A North Atlantic hop via the northern route is also suggested as a possibility.

Grain Probe Report

Report Containing 40,000 Words To Be Tabled In House Of Commons

New York, N.Y.—The work of the Royal Grain Commission, appointed by the Canadian government to find out whether or not there is grain futures is injurious to the interests of the producer, came to an end as its members signed their report aboard the "Mauretania," just before she sailed for England bearing Sir Josiah Stamp, noted economist, who served as chairman of the commission.

The report, which, members said, is about 40,000 words in length will be taken to Ottawa by L. E. Pearson, secretary to the commission, and it is expected, will soon be tabled in the House of Commons.

Thresh Last Year's Crop
Saskatoon, Sask.—Threshing will be completed the territory around Prince Albert this week, according to T. F. Mollard, travelling superintendent for the Pool Elevators, who has returned from an inspection trip in that area. Due to wet weather last fall and the October snow storm a considerable quantity of grain remained in the stock. This grain has wintered well and is for the most part grading straight.

War Claims Heard
Ottawa, Ont.—A total of 457 cases have yet to be reported by the war claims commissioner, Errol McDougall, Montreal, of which 308 claims have already been heard, leaving a balance of 149 cases. If, however, jurisdiction is admitted in the claims arising out of the Armenian massacres, which were filed in 1920-21, there will be an additional 271 cases yet to be reported on.

Many Deported
Ottawa, Ont.—Of those who came to Canada under the 3,000-family scheme, 168 persons, including men, women and children have been deported. Hon. W. A. Gordon, Minister of Immigration and Mines, gave this reply in the House of Commons to a question by H. E. Spencer (U.P.A., Battle River):

Princes Welcomed Home

Prince Of Wales and Prince George End Long Journey

Windsor, England.—The Prince of Wales and his brother, Prince George, ending an 18,000-mile trade mission to South America, returned to the family hearth and were joyfully welcomed by the King and Queen.

Their arrival at Windsor Castle from Paris after an absence of three and a half months was the occasion for a happy family reunion. Their parents and the Duchess of York, greeted them enthusiastically. Princess Elizabeth, their niece, threw her arms about their necks and gave them each a loud kiss.

Prospects Good For Cattle Shipments

Increased Demand From Great Britain Is Indicated

Montreal.—Shipments of Canadian cattle to Great Britain are being maintained and evidence indicates that there will be an increased demand from Great Britain as the season progresses. The first shipment from Montreal this season left April 30, aboard the "Manchester Commerce," taking 442 head, while seven other lots are booked for May and June. All shipments will average around 400 head.

ACTION TAKEN BY FRANCE WILL AID SALE OF WHEAT

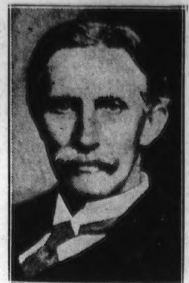

Winnipeg, Man.—France's increase in the percentage of foreign wheat to be mixed with the domestic product will "help a little" in improving exportation of Canadian grain, according to A. P. White, president of the Winnipeg Grain Exchange. France, it is announced, increased the percentage of foreign wheat for mixing to 25 per cent., and Mr. White believed that this move would aid somewhat in decreasing the Canadian surplus but he expected no drastic rise in Canadian exports.

"Any removal of restrictions against foreign wheat on the continent tended to improve Canada's position," Mr. White stated. He also intimated that it would benefit other countries shipping wheat to France. He was unable to state whether the increase in the percentage of foreign wheat for mixing, made by France several weeks ago, had caused any undue jump in Canadian shipments to that country, but he believed the jump to 25 per cent. was bound to relieve the situation in this country slightly.

"Germany," Mr. White revealed, "is at present contemplating the lowering of her tariff against foreign wheat which would add further in the clearing of Canada's surplus." The European countries, he said, will shortly come into the market for wheat, resulting in a lowering of all tariffs and an increased demand for the Dominion's product.

John I. McFarland, general manager of the Central Selling Agency of the Wheat Pool, believed France's action gave a brighter outlook for the removal of Canada's surplus. Several weeks ago, he said, France increased the percentage and it was an improvement in export. "The raise to 25 per cent," he added, "will be welcomed."

NOTED ECONOMIST

Sir George Palah, international economist, who said while in Montreal: "If the five-year plan succeeds it will mean the end of communism in Russia."

Steamer Beothic Will Make Annual Expedition

May Again Make Attempt To Reach Winter Harbor, Melville Island
Ottawa, Ont.—The annual expedition of the steamer "Beothic" to the Canadian Arctic archipelago will be carried out as usual this year by officials of the Northwest Territories branch of the Department of Interior and the Royal Canadian Mounted Police. The "Beothic" will leave for the Arctic about the end of July and visit all the northern police posts as well as the various posts where "N.W.T." men are stationed.

It is understood there will be another attempt to reach Winter Harbor, Melville Island, to inspect the cache there. This cache was put in over 20 years ago, and while it has been visited by travellers with dog teams, a boat has not called in there since it was established.

Last year an attempt to reach the cache was unsuccessful, due to ice conditions.

Value Of Corn Imports

Runs Into Millions and Duty May Be Demanded

Ottawa, Ont.—Canada is importing, for purposes other than distillation, about 12,000,000 bushels of corn worth in excess of \$10,000,000 every year. This information, given to the House of Commons in answer to a question some days ago, may be the basis of a demand for a duty on imported corn, which now enters the Dominion free.

The corn, brought from the United States, and even from the Argentine to some degree, is used for feeding livestock in the central provinces. It is the claim of some western M.P.'s that the eastern market for feed should be closed to prairie growers of barley and other coarse grains. A demand for the reduction of freight rates on these grains, when shipped for domestic consumption, has already been voiced. A stiff duty on foreign corn may now be asked.

President Of Canadian Press
Toronto, Ont.—M. E. Nichols, vice-president and managing director of The Winnipeg, Man., Tribune, was elected president of the Canadian Press, succeeding John Scott, managing director of The Toronto, Ont., Mail and Empire, who for personal reasons declined a third term.

King and Queen of Siam

King Pradajipok and Queen Rambai-Barni, monarchs of Siam, posed briefly for cameramen aboard their special Canadian Pacific train at Vancouver before starting their trip to New York via the Canadian Rockies and Chicago. Indisposed when the Canadian Pacific liner "Empress of Japan" arrived at Victoria and Vancouver after a record-breaking voyage from Yokohama, His Majesty King Pradajipok was unable to receive the official delegation of welcome. His first public appearance was when he walked from the royal suite aboard the big white liner to the waiting royal train parked beside the ship.

Fatal Plane Crash

Two Lives Lost When Machine Crashes At Brandon

Brandon, Man.—The first major plane crash in the history of Brandon brought death to two young airmen when their machine crashed from a height of 1,000 feet and burst into flames near the local aerodrome.

The victims were: William Clark, 21, owner of the plane, and son of Col. and Mrs. F. J. Clark, Brandon, and William F. Clark, 27, pilot of Wawanesa, Man.

Returning from a flight to Wawanesa, the airman were preparing to land at the aerodrome when the plane swerved into a spin, exploded and burst into flames.

Like a rocket, it dived to earth, bringing instant death to the pilot and owner.

It was some time before the flaming wreckage could be approached by airport attendants, and the bodies, entangled in the debris, were charred beyond recognition. Nothing was left of the plane but the bones, twisted and mangled.

Hundreds of persons flocked to the scene of the crash, and police had great difficulty in keeping the crowds away from the fire-stricken wreckage.

British Economist Gives Opinion On Depression

Might End In Three Months Says Sir Josiah Stamp

New York.—The end of the present economic depression in Canada and the United States will not be in sight before the end of the next three months, Sir Josiah Stamp, noted British economist, told the Canadian Press. The depression will probably come to an end in both countries simultaneously, he said, although recovery in the United States might be slightly more rapid than in Canada.

"I do not think we can say the depression will end in three months," he said, "but I will say it can't end before that time. Some time ago I said it would not end before May. It may end in June, I now believe it cannot do so before the end of another three months."

UNEMPLOYMENT INSURANCE PLAN IS FORTHCOMING

Ottawa, Ont.—The government hopes to submit to parliament "at the earliest possible moment" legislation providing for some form of unemployment insurance. A statement to this effect was made by Premier R. B. Bennett, in the House of Commons.

The prime minister, however, made it clear that such legislation can only be submitted after careful inquiry and the gathering of the fullest information. The department of finance will not act without preliminary investigation. "That course of action would spell disaster; it would bring suffering, not happiness, to those concerned."

The prime minister made one definite declaration. He would never support a system of non-contributory insurance. Canada could not stand a system such as that in operation in Great Britain, with its tremendous drain on the exchequer.

The question of unemployment insurance came before the House in the form of a motion placed on the order paper by A. A. Heaps, Labor member for Winnipeg North. It called upon the government to "take into consideration the immediate establishment of a federal system of insurance against unemployment, sickness and invalidity."

He submitted his proposal not as a cure for unemployment, but merely as a palliative, said the Labor member at the outset of his speech. The federal government should "give the lead" to the provinces in such legislation.

The word "immediate" should be deleted from the resolution, suggested Mr. Bennett, and the word "contributory" be included. It was impossible for the government to deal immediately with a matter which might require months of research and actuarial work; also, Canada was about to take a census, and the information then gathered would be of great value in reaching conclusions as to the nature of the proposed scheme. Co-operation of the provinces would be necessary.

Support of the motion was voiced by Mr. King. Modern conditions, involving the use of invention, resulted in men being thrown out of work, and countries were faced with the necessity of providing unemployment relief or unemployment insurance. He favored the latter. If a Dominion old age pensions scheme could be devised, he saw no reason why a scheme of unemployment relief should not also be evolved.

'QUAKE CAUSES HEAVY LOSS IN SOUTHERN RUSSIA

Moscow, Russia.—Further earthquakes in the Soviet Republic of Azerbaijan in Transcaucasia caused fear that the total number of deaths in the widespread disturbances, which started Monday, April 27, may mount to more than 500, already unofficially estimated.

More than 2,000 persons were injured in the original quake Monday, April 27, which wrought great damage in the southern Transcaucasian sections of the Soviet Republics and was felt most severely in Armenia. Today's renewal of shocks occurred in the Zangazur district of Azerbaijan.

Great suffering is reported in many sections and in some places residents have deserted their stricken villages and are living in the open. All communication was disrupted at certain points and authorities are having difficulty determining the exact number of casualties.

The government has launched relief work and provided 500,000 rubles (about \$200,000) for immediate use among the sufferers. Food and medical supplies are being rushed to the devastated areas, where hospital shelters are being erected to care for the most seriously injured.

While no definite estimation of the amount of damage has been made, it is certain to run well over \$1,000,000.

Labor Vote Split

Conservative Candidate Wins In By-Election In England

Ashton-under-Lyne, England.—Facing a hooting and jeering mob, Sir Oswald Mosley, brilliant young Socialist leader, outbraved the bravest of them, and figuratively snapped his fingers in the faces of more than 1,000 disgruntled electors of the Ashton constituency. The result of the by-election in this constituency was announced. Lt.-Col. J. Broadbent, Conservative, won the seat from J. Gordon, Labor, and A. Young, Mosley's New Party candidate—but had it not been for the Mosley candidate, it appears Labor would not have lost the seat.

Broadbent polled 12,420 votes; Gordon, 11,005; and Young, 4,472. Given even two-thirds of Young's vote, which would be normally expected, Gordon would have won the seat by a slight majority. As it was, the split in the Labor vote was too great a handicap for Gordon.

The constituency has ever been a stormy rock in the political sea. Sir Oswald, with Gordon and Broadbent, were the town hall waiting for the result. With Mosley were several women. When the result became known, an angry crowd gathered outside. Gordon was taken out of the building by a side door, under a strong police guard. Mosley, however, went to the front door. He paused at the top of the stairs and gazed defiantly at the raging crowd, who hooted and jeered him.

With hands in his pockets, and a slight smile on his face, Mosley walked slowly down the steps into the street. The crowd rushed around him, but he continued walking slowly. Police closed around him and escorted him to his hotel headquarters. Despite the turmoil and the threatening appearance of the mob, Mosley refused to move any faster than his slow, nonchalant walk.

Would Change Naval Treaty Plan
Paris, France.—Difficulty in arriving at an agreement on the exact meaning of the Italo-French naval limitation treaty has led to an unofficial proposal from quarters close to the ministry of marine that France drop the treaty with Italy and each country make unilateral statements as to her naval needs.

Saskatchewan Musical Festival
Moos Jaw, Sask.—Entries are being received in large numbers for the Saskatchewan Musical Festival, which will be held here June 1, 2 and 3, 4. It was learned recently from local festival officials. While no definite figures can be quoted at the present time, the entries are stated to be quite up to expectations.

Conference Will Decide
Ottawa, Ont.—The question whether a member of the House of Commons should or should not be compelled to vote in a division will be settled by a conference, whose personnel will comprise the leaders of all groups in the Commons. This was decided at a meeting of the Canadian secretary of state, reverted to the matter.

Encouraging Trade Outlook

Canada Becoming Increasingly Independent in Her Industries

Canada is becoming increasingly self-dependent in her industries, her shipping and her agriculture, according to Canadian government statistics. These figures show that despite an increasing apparent consumption of manufactured commodities, Canadian manufacturers are more than holding their own in supplying more than three-quarters of this demand. That an increasing percentage of Canadian wheat is being exported through Canadian ports to overseas countries, that all coke used in Canadian blast furnaces is now produced in Canada, that the quality of Canadian meat and dairy products is improving under government grading and that Canadian exporters are increasingly successful in their search for new markets throughout the world.

The apparent consumption in Canada of manufactured commodities in 1929, figures for which have just been issued, amounted to \$4,388,376,487, an increase of slightly more than six per cent. over the previous year. Of this total, Canadian manufacturers supplied 76.5 per cent. in 1929, and 76.0 per cent. in 1928.

Gross value of manufacturing production in 1929 amounted to more than 4 billion dollars, while the capital invested aggregated over five billion dollars, an increase over the preceding year of 7.6 per cent. and 6.3 per cent. respectively.

Approximately 58 per cent. of Canada's overseas shipments of wheat during the past eight months of the present crop year passed through home ports as compared with 55.5 per cent. in the corresponding period of the 1928-1929 crop year. While overseas shipments through Canadian ports have increased by 62 per cent. shipments through Canadian ports have increased by nearly 50 per cent. while those through United States ports have increased by only 44 per cent.

In Canada's foreign trade during the past fiscal year, the United States purchases from the Dominion showed increases over the preceding year in sugar, silver, coal, electrical energy and automobiles and parts. The latter were mainly re-exports of original imports from that country. Canada's exports to the United Kingdom showed increases in canned vegetables, cattle, canned fish, raw hides and unmanufactured leather, raw wool, farm implements, hardware, iron pigs and ingots, nickel, petroleum and its products.

Prince Understands Value Of Advertising

Gives Practical Advice To British Business Men In South America

T. B. Macaulay, president of the Sun Life Assurance Company of Canada, was greatly impressed by the sound, practical advice offered to British business men in South America by the Prince of Wales during his recent visit. At a banquet in Buenos Aires, the Prince told his fellow countrymen to send out their principal men to South America, not only the representatives of business firms. He advised them to learn Spanish. But, above all, he warned Britons against hiding their light under a bushel. They must advertise, he declared.

To drive his point home, the Prince quoted a parody, perhaps one that he had made up for the occasion:

Early to bed,
Early to rise,
But you'll soon be dead
If you don't advertise."

Joke Still Good

"There," said the plumber, "in spite of all the silly jokes about us, we've not forgotten a single tool. My mate's here with me, we've not got to go back for anything and—"

"You've come to the wrong address," said the maid.

More than 1,000 reindeer were killed on one railway line in Sweden last year, \$10,000 being paid in compensation to owners.

"Yes. Nature is lovely, but she ought not to be higher than our storeys up."—Lassie Blatter, Berlin

W. N. O. 1898

Might Solve Difficulties

Sir William Clark Suggests More Mixed Farming in Canada

The world depression of 1930 has affected Great Britain less than any of the other countries in the world, said Sir William Clark, High Commissioner for Great Britain in Canada, addressing the Canadian Club at Ottawa, Ontario.

Referring to the Canadian wheat situation, the speaker said: "In 1919, the Canadian production of wheat doubled, and with Russia shut out since the first of the war, it took all Canada could grow to meet the demand." Following the war, the drought of 1921 killed the European grain surplus for some years, he said. Now Canada was facing the same position England had confronted. He was of the opinion that industries over-developed during the war to suit conditions then facing England, were a large factor in the present depression.

"I'm not suggesting that you give up growing wheat entirely," said Sir William. "But even your authorities are stressing the great advantages to be obtained from mixed farming. Presumably some change must be made to meet the trend of the times, and it is likely that things will become more diversified, both in Canada and in England."

Athletics and Universities

Venerable Deans Do Not Believe in Making Professional Athletes Out Of College Men

Making a professional athlete out of a college man, according to Stanley Coulter, dean of Purdue University, is "like cutting wood with a razor."

The venerable "dean of deans" addressed the annual conference of more than 100 deans of men of American universities and colleges.

"I wonder," he said, "what people who spend money for universities must think about their turning out baseball pitchers and catchers, half-backs and coaches."

In discussing youth and age he defined youth as "the future" and said it was a time for adventurous, impulsive action.

"Deans," he continued, "fall to take into consideration Youth's tendency to do things, because it is self-reliant. It is the time when one does everything. For that reason those who supervise youth should be patient."

Ticket Inspector Was Wise

Called Bluff Of Calgary Passenger and Won Out

On entering a compartment of a C.N.R. main line train, a ticket inspector noticed a passenger who, affecting an air of familiarity with him, said: "I'm working down the line, you know. I'll be all right." The inspector looked suspicious, but said nothing. He was going away when apparently an idea struck him. Turning to the passenger who had no ticket, he said: "Oh, I say, what's the right time? My watch has just stopped. Twenty minutes past five" was the reply. "Oh, it is, is it? Now, if you don't show me your pass, pay the fare, and you come. No railway man would say twenty minutes past five; he'd say 'five-twenty.'" The passenger paid.

Poultry Production

Figures Indicate Steady Growth Of Industry In Prairie Provinces

The growth of poultry production in the three Prairie Provinces has been steady and consistent during the past three years. The number of birds raised annually is seen in the following table:

	Manitoba	Saskatchewan	Alberta
1927	4,169,760	7,516,978	5,854,229
1928	4,414,056	8,420,345	6,213,706
1929	5,584,083	9,403,452	7,597,879
1930	5,658,700	9,507,618	7,625,400

Surprise For Two

Two men stood looking at a car that one of them had bought recently.

Said Moses: "Ikey, that car is worth one thousand pounds. I'm going to surprise you. I will sell it to you for five hundred."

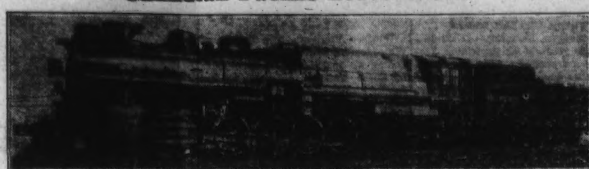

"Moses," replied Ikey, "I'm going to surprise you. I will give you fifty for it."

"Now, Ikey," answered the other, "I am going to surprise you again. I will take your offer."

Reminds Like New Man

Nothing new under the sun? Certainly there is! A portable strawberry patch comes forth from Miami to claim its place in the sun and in the news. A retired Kansas City business man, now living in Florida, picked up his strawberry patch of 1909 plants and put it in greenhouse and has been picking strawberries since January.—Christian Science Monitor

Canadian Pacific Leads World

Locomotive on the North American Continent, and the largest and most powerful of its type in the world, the Canadian Pacific Railway Engine "3000," product of Canadian brains and skill, and built largely of Canadian materials at the Angus Shops, Montreal, has just been completed, and will be taken West for use on the Company's Rocky Mountain territory.

Data of its size, efficiency and strength disclose some amazing figures. The weight of the engine is 455,000 lbs., and the tender 200,000 lbs., a total of 755,000 lbs., or 32 3/4 tons. It is 99 feet 3 1/2 inches in length overall. The ten driving wheels are each 63 inches in diameter. The tractive effort is 80,000 lbs., which means that it will haul on a level track a freight train over a mile in length, composed of 150 forty-ton freight cars and having a total weight of 6,000 tons. The

tender has a capacity of 12,000 gallons of water and 4,300 gallons of fuel oil, enabling the locomotive to make long hauls without replenishing. The aggregate length of all the same steel tubes used in the construction of the boiler units alone totals 18,600 feet or slightly over 3 1/2 miles.

The "3000" is termed a "multi-pressure" locomotive because steam is generated in three separate portions and at three different pressures. And another outstanding feature is the firebox unit designed for 1,700 lbs. pressure per square inch with an average working pressure of about 1,350 lbs. This unit is really a closed circuit containing approximately 300 gallons of distilled water. The use of distilled water is to prevent accumulation of sludge and scale so common in water tube boilers. The closed circuit or firebox unit extends into the high-pressure boiler drum in

the form of 16 coils, called heat transfer coils.

There are three locomotives of this type in Europe which are showing excellent savings in fuel, ranging from 25 to 35 per cent., in comparison with the conventional design of locomotive. The largest of the European locomotives is only 82 per cent. of the weight and develops only 28 per cent. of the power of the "3000."

In co-operation with the American Locomotive Company, and the Superheater Company, of New York, H. B. Bowen, chief of Motive Power and Rolling Stock, Canadian Pacific Railway, designed the "3000," after he had made a special trip to Europe in 1929, for the purpose of studying various types and developments of locomotives there. The construction of this plant locomotive was handled under the direct supervision of J. Burns, Works Manager, Angus Shops, and T. Donald, of Mr. Bowen's staff.

Fighting Fire With Fire

Parasites Sent From England To Destroy Services On Prairies

Research workers of the British Empire marketing board have proved the truth of the saying that fleas have lesser ones upon their backs to bite them. And 90,000 parasites have been shipped from Farnham, England, to Belleville, Ontario, each carrying its individual parasites. They are destined for the wheat fields of Western Canada—to bring destruction to their obnoxious brethren.

Last autumn collectors roamed the English wheatfields, collecting stubble from which grubs were carefully shaken out. Later, at the "parasite zoo" at Farnham, the grubs were infected with smaller parasites. Careful propagation under the eyes of the board's experts resulted in a healthy crop of vermin clinging to the 90,000 sawflies.

It's another twist of that equally well-known adage—fighting fire with fire.

With Charles F. Hoeveler, of Los Angeles, a former flyer, MacMillan said he would pioneer a proposed northern air mail and passenger route at the request of Great Northern Atlantic Airways.

They plan to take off from Boston, June 1, for Labrador.

Much Too Busy

An Italian, having applied for American citizenship, was being examined in the naturalization court.

"Who is the President of the United States?"

"Mr. Hoover."

"Could you be President?"

"No."

"Why?"

"Mister, you scuse me, please: I verria busy. I work da truck."

Declines Invitation

The London Daily Mail said the Irish Free State had invited Alfonso, deposed Spanish monarch, to reside there, but that he declined the invitation. Many Irish people claim Spanish ancestry dating back to the Spanish Armada, some ships of which were wrecked on the Irish coast.

Preaching and Practice

Proprietor Of Religious Weekly Lacked Faith In Own Prophecy

T. Lewis Beyer, formerly on the official staff of the Guildhall, London, England, tells a good story in his reminiscences, "Gog and Magog and I." The proprietor of a certain religious weekly, which devoted a good deal of space to prophecy about the end of the world, came before the Court with an application for a lease. They said to him, "You write some of the prophetic articles?"—"I do."

"You lately stated that the world would come to an end in a few years?"—"I did." "Then why are you now appearing for a 99-years' lease of your property?"

"What must one do to have beautiful hands?"

"Nothing."

The Influence Of Books

People Can Be Harmed By Reading Types Unsuited To Them

Reading which can be a wonderful healer can also exercise a very malignant influence. Dr. J. C. Meskin, physician-in-chief of the Royal Victoria Hospital, stated in an address on what books and reading have done for civilization and where they are leading us, before the Hospital Library Book Club, recently. A book about a fire could do real harm to an excitable patient on the fifth story of the hospital, as could a love-story to a neurotic, while books on travel and of biography to the bed-ridden may have therapeutic value in that they occupied the mind of the reader with thoughts external to himself. In order to gain a maximum of good from the library the speaker suggested that books be classified as suitable for certain types of cases and that the doctors label cases as being one of these types.

Jasper Park "Haymaker"

Interesting Animals Found In One Of Canada's Famous National Playgrounds

One of the interesting and curious little animals that inhabit Jasper National Park in Alberta, is the pika. It is about the size of a Guinea pig, with rounded ears, short legs and no visible tail. It can often be seen running rabbit-like across the boulders. Another name for the pika is the "haymaker" from his habit of storing away dried grasses and plants for his winter food. Sometimes under an overhanging rock there will be found his miniature haystack, a bundle containing perhaps a bushel of well cured vegetation, which includes apparently specimens of every plant in the neighborhood.

Matches shipped from Sweden in the last three months of 1930 weighed 11,666 tons.

Highways Should Be Beautiful

Screening Billboards Do Not Fit Into Decorative Scheme

It is gratifying to note that new regulations have been passed by order-in-council of the Ontario government which will limit outdoor advertising to some extent. The regulations will limit any roadside place of business to a single sign and will not allow advertising to be painted upon barns, fences, rocks or buildings unless it is to the interests of some business conducted on the particular property.

In New Jersey a law was recently passed providing for an annual fee to be charged each company in the business of outdoor advertising. A permit must be obtained for each new sign erected. A tax of three cents a square foot is collected on all billboards except those on the premises where the advertising business is conducted. No billboards may be erected within 500 feet of a road intersection where it might obscure the view of motorists.

The time may not be far off when drastic regulations will have to be adopted in Canada respecting the erection of hideous billboards and signs. Public opinion is veering to the point where our highways are no longer regarded solely as a means of getting from place to place. The modern sign seems to be to beautify them and to make them as safe as possible for travel. Constructive screaming billboards do not fit into such a scheme of things.

Fur Farms In Western Canada

A Substantial Industry Has Been Built Up In West In Recent Years

Though fur-bearing animals trapped in their native habitats continue to multiply the greater percentage of mink, marten, and still continues to be, has in recent years been augmenting the catches of trappers and hunters with the products of fur farms. The fur-farming industry is followed on a commercial scale in each of the four provinces and in the Yukon Territory. In the past few years the industry in Western Canada has grown until it is now a substantial one. Official statistics recently issued show that the total value of fur farms in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon Territory amounts to \$8,677,142, an increase of \$2,860,000 in one year. The total number of fur farms is 999, of which 573 are fox farms, 249 mink farms, 108 muskrat farms, and 70 raccoon, marten, fishers, badgers, skunks, beavers, etc. Manitoba is the principal centre of the industry in Western Canada, with British Columbia, Alberta third and Saskatchewan fourth. The value of animals on the 999 farms last year was estimated at \$5,450,000, of which silver foxes alone accounted for over \$3,457,000. An interesting feature of the report is that the value of the muskrat population on the 108 farms increased in one year from \$113,710 to \$229,212, or over 450 per cent.

New Short Air Route

Inauguration of a new air route from North America to Europe by way of Churchill, Hudson Bay and Greenland is under consideration by British, Canadian, United States, German and French interests, delegates attending the midwest section Bankers' Association for Foreign Trade, in Indiana, were told by Case R. Howard, manager of the foreign department of the Canadian Bank of Commerce, New York.

Building Active In Winnipeg

The value of building permits in the City of Winnipeg for the month of March was more than double the rate for the same month last year, bringing the total for the year up to \$1,094,400. There is marked activity in home construction this year.

Wife: "I don't know what is the matter, but I have lost my head." Husband: "Huh! No more hints to buy."—Moussine, Charleston.

The photographs reproduced above show King Alfonso and Queen Victoria, of Spain, who relinquished their throne April 14, before a proclaimed provisional Republican Government. The King's abdication came shortly after a republic was proclaimed at Barcelona and several other Basque towns.

TIME FOR A PROPER ASSESSMENT

(Continued from Page 1)

Occupant	Building Tax	Business Tax	TOTAL
Printing Office	50.00	20.00	70.00
Mobbs Meat Market	12.88	30.00	42.88
Tredaway-Bannister	65.00	20.00	85.00
McRory Metal Works			8.25
Woods Garage	75.00	50.00	125.00
Baker Garage			48.75
Halliday & Co.	65.00	50.00	115.00
Wm. Laut.			85.00
U. F. A.	136.25	Hall Tax \$50	186.00
Atlas Lumber Co.			27.63

Owners do not pay business tax but are assessed in one sum for their building and business.

We have heard rumors of a ratepayers meeting to discuss the nuisance grounds question. I am sure the Council would welcome a discussion on Taxes and Tax Collections and we should give them 100 per cent. support in straightening out a bad mess.

BUSINESS cars, light delivery cars and taxis go farther with fewer interruptions on Goodyear Heavy Duty Tires. Road shocks at high speeds hold no terrors for the specially-built Supertwist carcass of the Goodyear Heavy Duty. The sharper, rugged blocks of its All-Weather Tread resist every effort of rain, snow and ice to slow up schedules.

We're proud to sell the Goodyear Heavy Duty Tire. We would like to put it on just one of your cars or trucks to prove what it can do for you. Why not make this worthwhile experiment now?

GOODYEAR HEAVY DUTY

EARLY DAYS OF CROSSFIELD

By P. I. McANALLY

Jas. Mayley, now somewhere in the far north, built the store now occupied by Mr. Johnson.

Mr. Mayley also erected the building occupied by Wm. Pogue as pool room and barber shop.

Chas. Hallgren now living in B. C., and J. S. Day now of Calgary, built and carried on a real estate business for some years where I. McRory has his tinshop.

Ontkes & Armstrong built and run a general store where Halliday & Co. and Merrick Thomas now carry on business.

Dr. G. A. Bishop built an office and drug store at the ally, rear of the Bank property, with a very nice hall upstairs, which was used as a school room before the present school was built.

This building has been moved and remodelled and is now the Mayor's residence.

Gazeley's old stand, also the building occupied by Mr. Ure and Sid Jones, was built by McKay Bros., Chas. Don and Leslie.

Jas. Sutherland was our first postmaster and was succeeded by Chas. McKay, who also had the telephone central in the McKay building.

The late W. B. Edward (who was killed in action in the World War) was the first McCormick agent, and erected the building recently used by Mr. Sharpe, in 1907, and carried on his business there.

He was succeeded by A. W. Gordon in 1909, who continued the implement business for some years.

In 1906 and for some few years following we had a splendid brass band, conducted by Geo. Boyce now living at Langley Prairie, B. C., also a bandstand on the R. R. grounds near the station. Later the band was conducted by Sid Willis, and it was a credit to any community.

Fred Stevens was our first baker, and he made good bread. Fred always seemed to be normal until just prior to the last Dominion election.

Mr. Editor, congratulations are due you for the way you have revived the public spirit of the Village.

There always have been some public spirited men and women in Crossfield, but at different periods they were in the minority, consequently the place did not prosper as some of the pioneers had expected.

The Tennis Tournament

The Beginners Tennis Tournament was completed on Wednesday and was won by that youthful tennis star Gavin Goldie, eleven year old son of Mr. and Mrs. Thos. Goldie, well-known tennis players.

The results:

Gavin Goldie	51
Bubbles Goldie	50
Leslie Spivey	49
Grace Williams	40
Alice Colliutt	37
Gladys Metherall	37
Robt. Hay	35
Ronnie McFadyen	33
Francis McFadyen	25
Peggy Cavander	15
Vivian Hewitt	14

Enjoyable Birthday Party

Miss Florence Cruickshank celebrated her birthday by taking a number of her girl friends to the show in Calgary on Saturday, and on their return were entertained at the 'Oliver Cafe' to a delicious lunch.

The guests were: Gladys Willis, Wilda Laht, Eva MacAulay, Norma Miller, Mary Murdoch.

J. Reeves, M. Thomas, Geo. McLeod, C. Richardson, Clint Thompson, and A. High local Oddfellows attended the 112 Anniversary Services of the Lodge at Airdrie on Sunday.

Our local poet, Percy Griffiths had the pleasure of hearing one of his recent compositions, a hymn, broadcasted over the radio from the Bible Institute, Calgary on Sunday last.

THURSDAY, MAY 7th, 1931

Local and General

Mother's Day, Sunday, May 10.
CLEAN UP. A clean town makes a clean people—physically and morally.

Miss C. Robertson of the school staff is confined to her home through illness.

Mr. and Mrs. R. Hutton and Bobby of Calgary spent Sunday with Mr. and Mrs. Miller.

We understand that J. Ure has bought the Gazeley Block from Geo. Fox.

Fred Stevens was out to the Dougan Ranch last week and helped dehorn 310 head of cattle. Only three citizens turned out to the baseball meeting on Monday night.

Remember the dance in the East Community Hall, Monday, May 25th. Good music and the usual good time.

Mrs. Cartwright, Mrs. Currie's mother has returned to Crossfield after spending three weeks in Calgary.

Mrs. Currie's brother who has been sick in the General Hospital Calgary is spending sometime at the Rectory.

Mrs. P. C. Griffiths and daughters were visitors to the city during the week-end.

Miss Eva Jarman and Frances Mobbs spent the week-end in Calgary.

The many friends of Mrs. H. Stone of Madden, will regret to hear that she is seriously ill with pneumonia.

The Madden baseball team is holding a dance in the Beaverdam Hall on Friday, May 8th. Music by the Borbridge Orchestra. Admission: Gent's 50c.

Ike and Charlie Greenizan were seen getting on the head end of the north bound passenger train on Tuesday and we understand are on their way to the coast.

Mrs. M. Clay who has been conducting a beauty parlor here for sometime left on Wednesday for Calgary, where she will in future reside.

Miss Jean Scott, who is attending the University of Edmonton arrived home on Saturday and will spend the holidays here with her parents Mr. and Mrs. S. Scott.

Mr. and Mrs. A. H. Miller and son Lexy of Calgary were visitors in town on Sunday. We understood Mr. Miller has resigned his position with the Canadian Bank of Commerce.

M. W. Malyon and Miss Rogers of the staff of the Olds School of Agriculture have been visiting the schools in the Crossfield and District School Fair and they report that the children are greatly interested and indications are Crossfield will have an outstanding fair here this fall.

A. Stevens purchased a shed from Chris Amussen and had Walter Gibson move it from behind the old Jessiman blacksmith shop to the Stevens property with his tractor. Steve intends to fix up this building and use it as a garage.

The railway crossing just south of the station has been greatly improved through the efforts of the Board of Trade and the Village Council, four carloads of cinders were secured from the C. P. R. and a road made from the track to the Main Street, also a bad hole filled just south of the station. The Village has also had erected tie-posts which do away with the short-cut besides being neat and useful, and in all is a decided improvement secured at a very little cost.

Jesus saith. Blessed are they they have not seen, and have yet believed.—John 20:29.

Proclamation

I hereby proclaim May 8th. to 15th. **CLEAN UP WEEK.** Let All Good Citizens do their utmost to make Crossfield clean and worthy of its good reputation in the interests of health and fire protection.

Dated this 4th. day of May, 1931.

J. M. WILLIAMS,

Mayor

Village of Crossfield

Floral U.F.W.A. Notes

Regular Meeting May 13th. Baby Clinic on Thursday, May 28th.

The regular meeting of the Floral U.F.W.A. will be held at home of Mrs. Orval Bills on Wed. May 13th at 2.30.

Answer to Roll Call—"A tribute to Mothers." All members are asked to bring their contributions.

The Rev. A. D. Currie will also address the meeting.

The date of the Baby Clinic is set for May 28th and some details have still to be discussed at this meeting.

The clinic is to be held at the home of Mrs. Verne Thompson and is free to all mothers with babies and children of pre-school age. See posters for more details.

Communication

I notice Mr. Amussen had a lot to say in the Chronicle, but it was a little one sided. I rented the shop on 28 of October, and did not expect to make money during the winter as I had to pay lights and motor charges. The reason I done this was to have the shop for the summer, when I knew I could make good. Just as work started to come in, Mr. Amussen gave me a written notice to vacate the shop on the 15th, as he was offered \$100 on Monday morning if he could get the building and another \$100 a little later on. I told him this was not enough notice as his agreement called for 30 days. He said after Monday his deal would be out of benefit. I told him I wouldn't see him loose any money. Rather than disappoint him I gave him possession at once without a place to go into this put me to a lot of expense and trouble in order to play square with my customers.

I don't see why Mr. Amussen didn't get a cleaner deal than I did. I am only sorry that he did not take warnings he got before renting the shop, it would have been in much better shape than I am today.

JAMES SHARP
Fred Doberstein seems to be running in hard luck since leaving Crossfield; last Saturday Fred was one of the victims who was injured in a head-on auto collision near Red Deer and it was not so long ago that the K. K. Klan at Lacombe, took Fred's pants off and gave him a dose of tar and feathers.
